## How to Use

1. **Connect the Adapter:**  
Insert the USB Type-C (male) connector into the USB-C port of your laptop, smartphone, tablet, or other compatible device.
2. **Connect to Display:**  
Plug an HDMI cable into the HDMI (female) port of the adapter, and connect the other end of the cable to your HDMI-compatible display (e.g., monitor, TV, or projector).
3. **Setup the Display (if required):**
  - On your device, navigate to the display settings to configure your preferences (e.g., extend display, mirror display, or set resolution).
  - Ensure the display supports HDMI 2.0 for 4K/60Hz output.
4. **Power On:**  
Once connected, the adapter will draw power directly from the Type-C device. No external power source is required.

### Safety Instructions

1. Use the adapter only within the specified power range (5V, 50mA).
2. Avoid exposing the adapter to extreme temperatures, moisture, or physical damage.
3. Ensure all connections are secure to prevent signal interruption.
4. Do not attempt to open or modify the adapter.

### 4. Adapter not working:

- Ensure that the adapter is compatible with your device.
- Restart your device and try reconnecting the adapter.

Thank you for using the **Type-C to HDMI Adapter**! Enjoy high-quality video and audio with ease.

### Troubleshooting

#### 1. No display output:

- Ensure the HDMI cable and adapter are securely connected.
- Confirm that your device supports video output via USB-C (DisplayPort Alt Mode).

#### 2. Resolution is lower than 4K:

- Verify that your device and display both support 4K/60Hz resolution.
- Check your device's display settings and select the proper resolution.

#### 3. Flickering or unstable display:

- Use a high-quality HDMI cable to ensure a stable connection.
- Make sure all cables are properly connected and free from damage.
