

## Magnetic stand wireless charging User Manual

Thank you for choosing the mobile power bank produced by our company. In order to better experience this product, please read the operation manual carefully before use.

1. It can be used as a magnetic wireless charging mobile power bank, compatible with Apple 12 and above series mobile phones.
2. It can be used as an ordinary wireless charging mobile power bank and is compatible with all mobile phones that support the Qi protocol. Support OP, HW, XM, SAM mobile phones that support wireless charging.
3. It can be used as a portable power bank, small and light, easy to carry, and supports 99% of mobile phone charging.
4. It can be used as a wireless charging stand, placed on the desktop, and charged at any time.

Note: Function description of wireless charging

- ★ Put the phone on the wireless charger, and press the side button to turn on the wireless charging function.
- ★ When charging the mobile power bank with the charger, when the input is in the fast charging state, the power bank is turned on Wireless charging, you can quickly charge wireless. If you turn on the wireless charging first, you are using the charger to charge the power bank, only the ordinary 5W wireless charging function is available at this time.
- ★ During the charging process of the mobile power bank, in a fully charged state, due to the charging protocol Go to 5V input state, turn on wireless charging at this time, only ordinary 5W charging, when unplugged after entering the charging cable, the wireless charging can be automatically restarted to enter the fast charging made.

### Product Features

- \*15W wireless output, unlimited fast charging with magnets.
- \*New three-in-one, power bank +wireless

charging stand + magnetic suction  
\*18W/PD20W fast charging, high efficiency charging.

- \*It can be charged and discharged at the same time, and the mobile phone and power bank can be fully charged quickly.
- \*LED indicator, showing real-time power.
- \*High-quality polymer lithium battery, safe and worry-free.

### Packing List

- \*Power Bank X 1

### Parts Description

1. Wireless charging power button
2. Bracket
3. Type C input/output
4. USB output interface
5. Battery indicator
6. Wireless charging (requires mobile phone to support this function)

### Product Specifications

Product name: Magnetic stand wireless charging  
 Cell capacity: 10000mAh  
 Battery Type: polymer lithium battery  
 Maximum output power: 18W/20W  
 Wireless charging power:  
 5W/7.5W/10W/15W max  
 Output USB: 5V-3A/9V=2A/12V=1.5A Max  
 Output Type C: 5V=3A/9V=2.2A/12V=1.5A Max  
 USB+Type C simultaneous output: 5V/3A  
 Input Type C: 5V=3A/9V 2A Max

## Description of charging and battery indicator lights

### ★ Charging Instructions

#### Type C input charging

Connect a Type C charging cable to the input interface, and start charging the mobile power bank, and the LED lights start blinking during the charging process. When the LED light is not blinking it means the charging is completed.

#### Side key function

Click the side button of the wireless charger and power bank, and the mobile power bank will automatically shut down and sleep.

### ★ Description of battery indicator

The fifth light is blue when wireless charging is activated.

The round lights equipped with the mobile power bank are convenient for you to control the remaining power and functions of the power bank.

## Precautions

\*If you do not use it for a long time, please charge the battery at least once every three months. During use, the device will be slightly hot, but it is normal.

\*Please keep the product dry and do not scrub with chemical cleaners.

\*It can be charged and discharged at the same time, and the mobile phone and power bank can be fully charged quickly.

\*Please take care of the environment, scrap and recycle according to the designated location, please do not dispose of it arbitrarily.

\*Do not allow children to use it, and use this device only under adult supervision.

\*Do not collide, disassemble or wade into water, get wet, or squeeze the device.

\*Do not apply the designed output DC power supply to equipment that does not meet the output parameter requirements, it may cause malfunction or fire.

\*Failure to follow safety instructions may result in fire, electric shock, or other injuries;

\*The battery must not be exposed to excessive heat.

\*The mobile power supply uses high-quality lithium polymer batteries, please use it with confidence.

\*Do not disassemble or piece the power bank by yourself; do not expose the power bank to fire, high temperature or water;

\*Please use a DC5V power adapter that meets national standards for charging.

\*If you find that the mobile power bank is bulging or other bad phenomena or the device being charged is bulging, please stop using the power bank.

## Common problems and solutions

★ When the power bank cannot be charged:

\*Please check whether the mobile power adapter is suitable, the connecting line and the adapter are in good condition.

\*It is recommended to use a suitable brand power adapter to charge it

\*Do not disassemble or pierce the power bank by yourself; do not expose the power bank to fire, high temperature or water;

★ When the power bank cannot charge other devices:

\*The power is too low, please charge it.

\*The voltage of the device being charged is not compatible with the output of the mobile power supply, please check the charging voltage of the device being charged.

\*The connection method between the charged device and the power bank is incorrect.

\*Please contact the after-sales service department of the local dealer for the internal circuit failure of the mobile power supply.
