

User Manual (DV120015)

Specifications

- **Cable Type:** USB-C/M to USB-C/M
- **Material:** Nylon braided textile, black metal connectors
- **Cable Length:** 1.25 meters (4.1 feet)
- **Voltage:** 20V
- **Current:** 3A
- **Power:** PD60W (Power Delivery)
- **Color:** Dark Grey
- **Key Feature:** Magnetic self-organizing design

Safety Information

- Ensure the cable is used with a compatible power adapter or device to avoid damage.
- Do not use the cable if it is frayed, damaged, or exposed.
- Keep the cable away from water, heat sources, and sharp objects.
- Avoid excessive bending or pulling of the cable.
- Keep magnets away from pacemakers, credit cards, and other magnet-sensitive objects.

Features

- **Magnetic Self-Organizing Design:** Embedded magnets allow the cable to fold into neat loops, reducing

tangling and keeping your workspace tidy.

- **Fast Charging:** Supports up to 60W Power Delivery (PD) for rapid charging of laptops, tablets, and smartphones.
- **High-Speed Data Transfer:** Ensures efficient data transfer between USB-C devices.
- **Durable Construction:** Nylon braided exterior and metal connectors ensure long-lasting durability.
- **Universal Compatibility:** Works with all USB-C devices, including laptops, smartphones, tablets, and other peripherals.

How to Use

For Charging

1. Connect one end of the cable to a USB-C power adapter.
2. Plug the other end into your USB-C device (e.g., laptop, smartphone, or tablet).
3. Ensure the cable is securely connected. Once plugged in, charging will begin automatically.

For Data Transfer

1. Connect one end of the cable to your USB-C device (e.g., smartphone or tablet).
2. Plug the other end into a USB-C port on your computer or another device.

3. Ensure a secure connection. Data transfer should initiate automatically.

Magnetic Self-Organization

- To organize the cable, gently allow the magnets embedded in the cable to connect and form loops.
- This feature helps maintain a tidy and compact cable configuration.

Maintenance and Care

- Clean the cable periodically with a dry cloth to remove dust and debris.
- Avoid exposure to excessive moisture or extreme temperatures.
- Store the cable in a cool, dry place when not in use.
- Do not disassemble the cable or attempt repairs yourself.

Troubleshooting

- **Cable does not charge:**
 - Possible Cause: Loose connection or incompatible adapter.
 - Solution: Check all connections and ensure the adapter supports PD60W.
- **Slow charging:**
 - Possible Cause: Insufficient power from the adapter.
 - Solution: Use a power adapter compatible with PD60W.

- **Data transfer not working:**

- Possible Cause: Faulty port or cable damage.
- Solution: Test the cable with another device or port to identify the issue.

- **Magnets not aligning:**

- Possible Cause: Dust or debris on magnetic surfaces.
- Solution: Clean the magnets using a dry cloth to ensure proper alignment.

Thank you for choosing this Magnetic Self-Organizing Charging and Data Cable!
